

# WOHLENBERG & PARTNERS INFRAESTRUCTURE PROJECTS DOSSIER 2026

Centro de Deportes de Contacto, Juegos  
Panamericanos, Estadio Nacional, Ñuñoa, Chile

Contact Sports Center Project, Pan American Games, National  
Stadium, Ñuñoa, Chile

Participamos en las siguientes empresas:

**WOH** / Wohlenberg y Asociados, Proyectos de  
arquitectura, urbanismo, ingeniería de detalles y  
diseño

**INICIATIVA CONSULTORES** / Consultoría y  
Asesorías de Infraestructura y Energía.

**OXALIS** / Inmobiliaria

We participate in the following companies:

**WOH** / Wohlenberg and Partners, Architectural, urban planning,  
detail engineering and design projects.

**INICIATIVA CONSULTORES** / Infrastructure and Energy  
Consulting and Advisory Services.

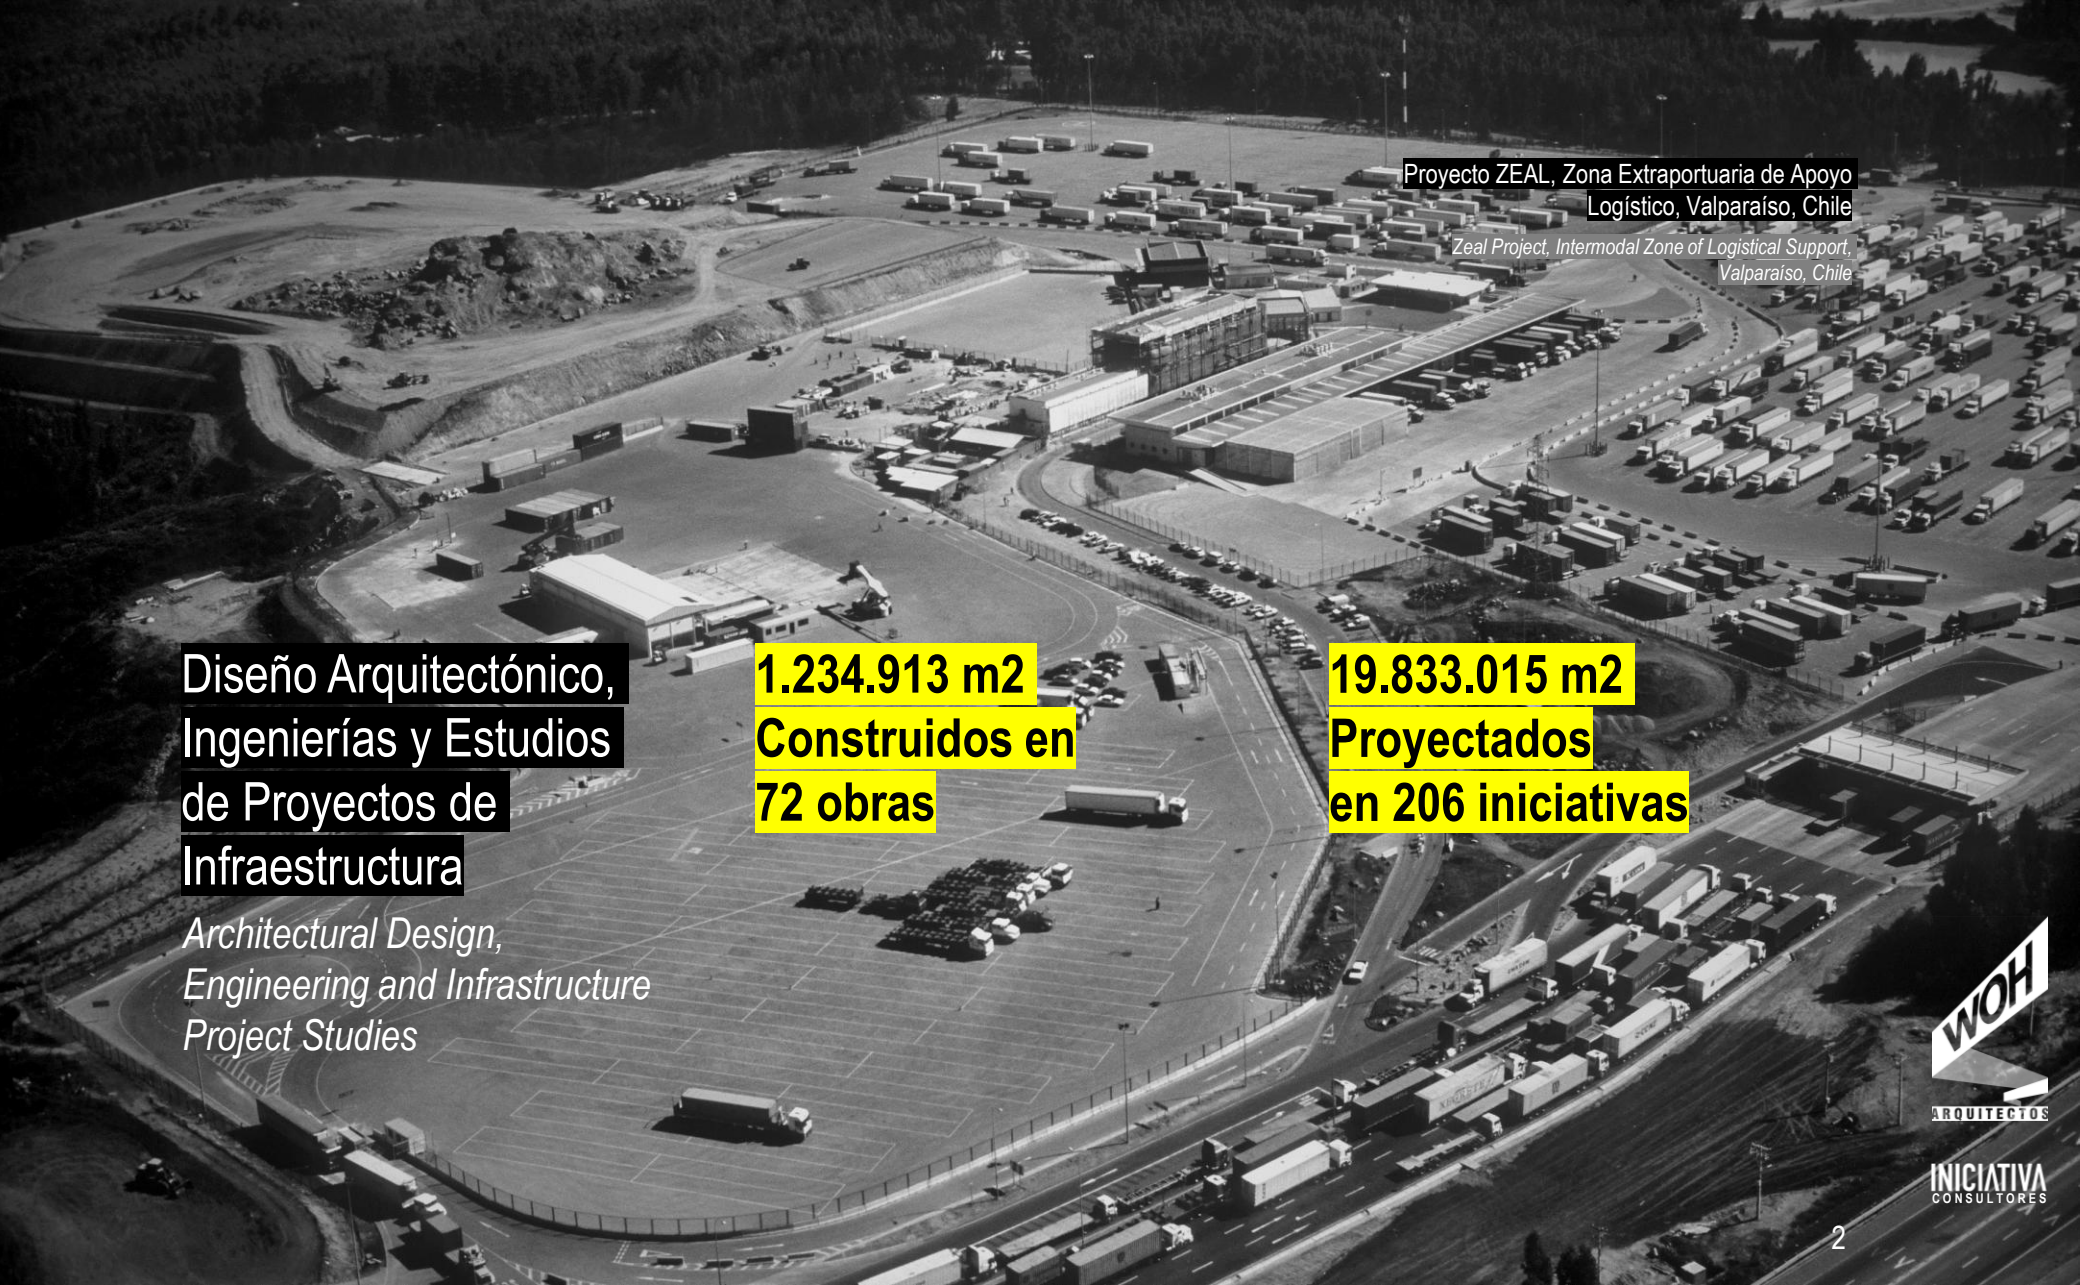

**OXALIS** / Real estate.

## 1.1 OFICINA STUDIO

Wohlenberg & Asociados, "WOH" es un estudio de arquitectura, consultorías e ingeniería de detalles y diseño, fundado por Johann Wohlenberg en 2004.

Somos un equipo multidisciplinario dedicado a resolver desafíos que nacen de la provisión de servicios de infraestructura, incorporando avances tecnológicos y sostenibles.

Nuestro equipo multidisciplinario está compuesto por Arquitectos, Ingenieros Civiles Estructurales y Constructores Civiles principalmente, cubriendo todas las áreas de liderazgo de la industria. Unidos a nuestros partner de empresas especialistas cubrimos la totalidad de los servicios que se puedan requerir en la industria en cualquiera de las etapas de producción; análisis, estudios, planificación, proyecto y construcción.

En cada nuevo compromiso adquirido, se adapta cada uno de los desafíos en cada etapa del encargo. La estructura flexible y la disciplina de equipo le permiten un nivel de adaptabilidad del proyecto que redunde en un avance sostenido y robusto.

Wohlenberg & Associates, "WOH" is an architecture, urban planning, detail engineering and design firm founded by Johann Wohlenberg in 2004.

We are a multidisciplinary team dedicated to solving challenges arising from the provision of infrastructure services, incorporating technological and sustainable advances.

Our multidisciplinary team is composed of Architects, Structural Civil Engineers and Civil Constructors mainly, covering all areas of industry leadership. Together with our partners of specialized companies, we cover all the services that may be required in the industry in any of the production stages: analysis, studies, planning, project and construction.

With each new engagement, we adapt to every challenge at every stage of the assignment. The flexible structure and team discipline allows a level of project adaptability that results in a sustained and robust progress..

### Licitaciones *Tenders & Bid Management*

- Generación y participación en licitaciones, iniciativas privadas y proyectos. *FUC Preparation and participation in tenders, private initiatives, and FUC projects.*
- Desarrollo de bases administrativas y técnicas, anexos y anteproyectos referenciales y ajustados. *Development of administrative and technical specifications, annexes, and preliminary reference and adjusted design proposals.*
- Preparación integral de propuestas para concesiones y procesos licitatorios complejos. *Comprehensive preparation of concession bids and complex tender documentation.*

### Consultoría *Consultancy*

- Desarrollo de metodologías para proyectos de infraestructura. *Development of methodologies for infrastructure projects.*
- Generación de valor sobre infraestructura existente. *Existing infrastructure value enhancement strategies.*
- Evaluación integral de proyectos. *Comprehensive project evaluation.*
- Análisis de gobernanza y gestión estratégica. *Governance and strategic management analysis.*
- Estudios de cabida y potencial inmobiliario. *Capacity and real estate potential studies.*
- Estimación de costos, programación de obra y planificación financiera. *Cost estimation, construction scheduling, and financial planning.*
- Informe Favorable para la Construcción (IFC / ex CUS). *Favorable Construction Report (formerly CUS).*
- Apoyo técnico para obtención de RS (MIDESO), estudios e informes sectoriales. *Technical support for RS (MIDESO) approvals, sectoral studies, and reporting.*
- Coordinación de especialidades técnicas, legales, ambientales e IMIV (ex EISTU). *Coordination of technical, legal, environmental, and mobility impact studies (IMIV / former EISTU).*
- Gestión y control de proyectos mediante plataformas Primavera, Presto y Microsoft. *Project management and control using Primavera, Presto, and Microsoft Project platforms.*

### Optimización de Proyectos *Project Optimization*

- Revisión y análisis de cálculos estructurales existentes. *Review and analysis of existing structural calculations.*
- Revisión de itemizados y coordinación arquitectónica. *Review of cost breakdowns and architectural coordination.*
- Desarrollo de propuestas de optimización estructural, incluyendo planimetría, memorias técnicas e informes de revisión independiente. *Development of structural optimization proposals, including drawings, technical reports, and independent review documentation.*
- Desarrollo de propuestas de optimización arquitectónica en concordancia con la ingeniería estructural. *Development of architectural optimization proposals aligned with structural engineering requirements.*
- Evaluación y cotización de soluciones y elementos arquitectónicos propuestos. *Evaluation and cost estimation of proposed architectural solutions and components.*
- Análisis comparativo de itemizados entre proyecto base y propuesta optimizada. *Comparative cost analysis between the base project and the optimized proposal.*

## 1.3 BIM

Desde el año 2008 desarrollamos nuestros proyectos bajo metodología BIM (Building Information Modeling), incorporando procesos colaborativos y multidisciplinarios que agregan valor en todas las etapas del diseño, coordinación y ejecución de proyectos. Nuestro enfoque integra arquitectura, ingeniería y especialidades mediante estándares nacionales (PlanBIM) e internacionales, permitiendo una coordinación eficiente, trazabilidad de la información y una comunicación clara con clientes y equipos técnicos. La implementación de construcción virtual y modelos coordinados nos permite anticipar interferencias, optimizar procesos constructivos y reducir incertidumbres durante las etapas de construcción y operación. Este enfoque se traduce en mejoras concretas en productividad, control de costos, eficiencia operacional y cumplimiento de los objetivos técnicos y financieros de cada proyecto de infraestructura.

*Since 2008, we have developed our projects using BIM methodology (Building Information Modeling), incorporating collaborative and multidisciplinary workflows that add value throughout all stages of design, coordination, and project delivery. Our approach integrates architecture, engineering, and technical disciplines under both national (PlanBIM) and international standards, enabling efficient coordination, information traceability, and clear communication with clients and project teams. Through virtual construction and coordinated digital models, we are able to anticipate clashes, optimize construction processes, and reduce uncertainties during both construction and operational phases. This methodology results in measurable improvements in productivity, cost control, operational efficiency, and overall project performance, supporting the technical and financial objectives of each infrastructure development.*

El proyecto se desarrolla en el marco de la concesión ZEAL, en su plan maestro avanzado ya desarrollado por equipo de la Empresa Portuaria de Valparaíso, debiendo entonces integrar decisiones ya resueltas además de mantener comunicación periódica en etapa de diseño con EPV. Para sus validaciones del proceso.

Puerto Terrestre Los Andes, ejecutado por otra oficina de Arquitectura, en nivel de ingeniería básica avanzada. En este escenario la Sociedad Concesionaria nos encarga la consultoría de plantear las modificaciones necesarias a proyecto original a fin de satisfacer sus requerimientos programáticos y de acuerdo a sus líneas de negocios y precio comprometido de construcción. En este contexto se plantea un nuevo Plan Maestro tratando de optimizar las obras ya en construcción del proyecto anterior en eficiencia y armonía con las nuevas proyectadas.

*Puerto Terrestre Los Andes, executed by another architectural firm at an advanced basic engineering stage. Under this scenario, the Concessionaire Company commissioned us to provide consulting services aimed at proposing the necessary modifications to the original project in order to satisfy its programmatic requirements, business objectives, and committed construction budget. Within this context, a new Master Plan was developed to optimize the works under construction from the previous project, ensuring greater efficiency, operational coherence, and integration with the newly proposed interventions.*

Se nos solicita ajustar el proyecto general y de detalles diseñado por otras oficinas. En concordancia con los objetivos de la concesionaria y la constructora

En los últimos años se ha participado además de los procesos de licitación aeroportuaria de Balmaceda, Punta Arenas, Arica y la Florida, generando las oferta técnicas que han obtenido las licitaciones en 3 complejos aeroportuarios

We have been requested to adjust the overall project and detailed design originally developed by other firms, in alignment with the objectives of both the concessionaire and the contractor.

In recent years, we have also participated in the airport procurement processes for Balmaceda, Punta Arenas, Arica, and La Florida airports, developing the technical proposals that successfully secured awards in three airport complexes.
